COMBITECH

SAINT

Signals Intelligence and Electronic Warfare Library Management System

Learn more about SAINT: **www.combitech.com/SAINT**

SAINT from Combitech is a secure and adaptable system for maintaining complex libraries for Electronic Warfare and Signals Intelligence purposes. SAINT is designed to scale from equipment registers, platform and radar libraries all the way up to a fully featured Signals Intelligence information management system. It provides users with modern web-based user interfaces to maintain, visualize, analyze, validate and export information.

Benefits

Understand the big picture

Improves threat identification and assessment capabilities by providing deeper understanding of the circumstances within the operations.

Protects valuable assets

Provides accurate and quality-controlled information for example for self-protection library development and other systems utilizing library data.

Supports planning

Supports effective decision making and enables successful operations based on reliable intelligence and EW information.

Features

Adapts to various data sets, roles and workflows.

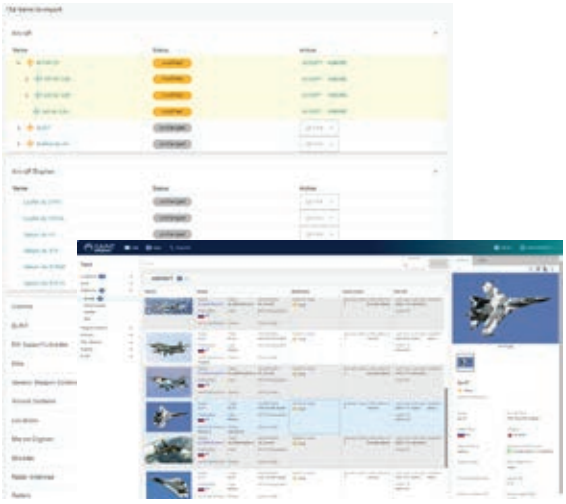
Provides a repository for the collected and refined library information.

Ensures quality controlled information in the right format for authorized users.

Provides an easy, modern and intuitive user experience.

SAINT from Combitech

Modern and adaptable library system



Secure, flexible and very cost-efficient

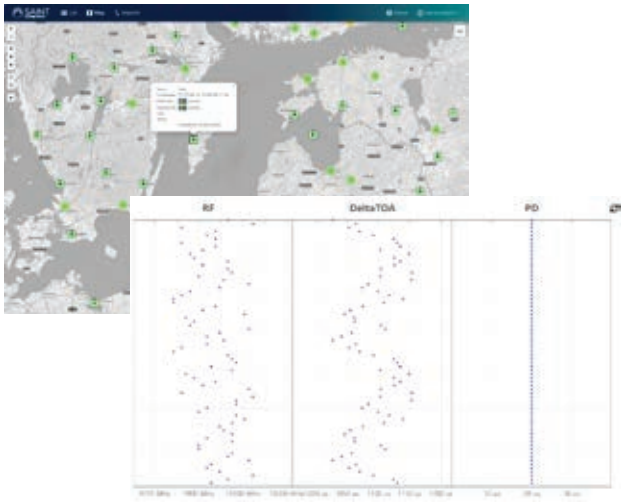
Highly efficient library solution offers the best value for your investment!

- Flexible data model and workflows adapt to your specific needs
- Sophisticated access control to data with configurable user roles and permissions
- Ability to describe and visualize complex associations
- Supports file attachments and quick preview for common file types
- Well documented and secure API provides access to the information
- Powerful search engine for both structured and unstructured data

Modern, standardised and uncomplicated

Get your operations running in no time!

- Modern web-based architecture – no need to install anything on client side. Allows a straightforward and easy access for authorized users.
- Intuitive user experience speeds up training and makes SAINT easy to use.
- COTS PC hardware and standard web browsers guarantee a well-established environment and predictable life-cycle costs.
- Recognized standards and well documented APIs ensure that SAINT can be integrated to your infrastructure in a secure and controlled fashion.



Be prepared with Combitech SAINT

- Build and improve your libraries to support mission planning, operations and decision making
- Protect all valuable assets by having accurate and high-quality threat data for library development
- Be prepared to face the complex challenges of modern threat environments

A turn-key combination for mission critical data

SIROS

ELINT data collection solution enables your operation to collect, refine and report important observations.

COLLECT, REFINE AND REPORT

SAINT

EW and SIGINT library solution enables your operation to rely on reliable and up to date Electronic Warfare Data

BUILD, ENRICH & PROTECT EW DATA, PREPARE FOR MODERN THREATS

COMBITECH

Trust & understanding

Combitech has a close relationship with the armed forces and the defence sector in the Nordic region. It's a relationship built on a mutual understanding of the importance of high security and confidentiality. Over many years we have built up experience, knowledge, and an understanding of the industry requirements imposed in terms of technical performance, safety, and budgets.

Nordic partner

Combitech is a Nordic tech solution and consulting partner based in Sweden, Finland, and India. We are developing, integrating, and supporting missioncritical systems for defence domain customers and industry partners. Combitech is an independent part of the defence and security group Saab AB.
